

# Contents

## Part One: Introduction to Information Technology and Systems

Chapter 1	Computer Systems – An Overview	3 – 26
Chapter 2	Operating Systems	27 – 42
Chapter 3	Foundations of Information Systems	43 – 64

## Part Two: Applications of Information Technology in Business

Chapter 4	Personal Productivity Software	67 – 94
Chapter 5	Enterprise Collaboration Systems	95 – 110
Chapter 6	Management Information Systems	111 – 142

## Part Three: Software and Database Concepts

Chapter 7	Program Design and Programming Languages	145 – 168
Chapter 8	Database Management	169 – 200

## Part Four: Networks

Chapter 9	Computer Networks	203 – 220
Chapter 10	Telecommunication Networks	221 – 234

## Part Five: Management of MIS

Chapter 11	MIS – Planning and Design	237 – 256
Chapter 12	MIS – Implementation, Evaluation, and Maintenance	257 – 274
Chapter 13	Information Resources Management and IT Governance	275 – 296
Chapter 14	Global IT Management	297 – 314
Chapter 15	MIS in Specialized Areas	315 – 328

## Part Six: Enterprise Functions and E-Business

Chapter 16	Basics of E-Business and Enterprise Application Integration	331 – 344
Chapter 17	Supply Chain Management and E-Business	345 – 368
Chapter 18	Enterprise Resource Planning	369 – 394
Chapter 19	CRM and E-Business	395 – 406

<b>Appendix</b>		407 – 436
-----------------	--	-----------

<b>Glossary</b>		437 – 470
-----------------	--	-----------

<b>Bibliography</b>		471 – 482
---------------------	--	-----------

<b>Index</b>		483 – 488
--------------	--	-----------

# Detailed Contents

## Part One: Introduction to Information Technology and Systems

---

<b>1. COMPUTER SYSTEMS – AN OVERVIEW</b> .....	3
<b>Evolution of Computer Systems</b> .....	4
<b>Generations of Computers</b> .....	7
First Generation Computers (1940-56).....	7
Second Generation Computers (1956-63).....	7
Third Generation Computers (1963-71).....	7
Fourth Generation Computers (1971-91).....	8
Fifth Generation Computers (1991 and Beyond) .....	8
<b>Organization of Computer Systems</b> .....	8
Input Unit .....	9
Central Processing Unit.....	9
Processors.....	10
Output Unit.....	11
Storage Unit.....	11
<b>Categories of Computers</b> .....	12
Classification Based on Purpose.....	1
Classification Based on Technology Used .....	1
According to Size and Capacity .....	13
<b>Peripheral Devices</b> .....	15
Input Devices.....	16
Output Devices .....	18
Memory and Storage Devices .....	20
<b>Overview of Hardware and Software</b> .....	24
Interaction between Hardware and Software.....	25
<b>2. OPERATING SYSTEMS</b> .....	27
<b>Managing System Resources</b> .....	28
Managing CPU Processes.....	28
Managing Input/Output Processes.....	29
Memory Management .....	30
<b>Operating System as a User Interface</b> .....	30
Functions of User Interfaces.....	30
Types of User Interfaces.....	30
<b>Types of Operating Systems</b> .....	32
UNIX.....	32
MS-DOS.....	33
Mac OS.....	35
Microsoft Windows.....	35

Novell NetWare.....	38
Linux .....	39
<b>3. FUNDAMENTALS OF INFORMATION SYSTEMS .....</b>	<b>43</b>
<b>Defining Information .....</b>	<b>44</b>
<b>Classification of Information.....</b>	<b>44</b>
Basic Classification .....	45
Based on Nature .....	46
Based on Usage .....	47
Based on Application .....	47
Based on Structure.....	47
Based on Form.....	48
Classification by Professor John Dearden .....	48
Other Classifications .....	49
<b>Presentation of Information .....</b>	<b>49</b>
Methods of Data Collection.....	49
Transmission of Information .....	51
Summarization and Message Routing .....	51
Information Discretion .....	52
<b>Benefits of Information .....</b>	<b>53</b>
<b>Quality of Information .....</b>	<b>55</b>
Errors .....	55
Bias.....	56
<b>Basics of Information Systems .....</b>	<b>56</b>
Functions of Information Systems.....	56
Components of Information Systems .....	57
<b>Use of Information Systems in Business .....</b>	<b>59</b>
<b>Limitations of Information Systems .....</b>	<b>62</b>
<b>Information System Design .....</b>	<b>62</b>
<b>Part Two: Applications of Information Technology in Business</b>	
<hr/>	
<b>4. PERSONAL PRODUCTIVITY SOFTWARE .....</b>	<b>67</b>
<b>Word Processing Software .....</b>	<b>68</b>
Writing .....	68
Editing .....	69
Formatting .....	69
Saving and Printing .....	70
Other Features .....	70
<b>Spreadsheet Software.....</b>	<b>70</b>
Workbook.....	70
Worksheet.....	70
Effective Worksheets.....	71
Data Types.....	72
Operators .....	72
Cell Formats .....	74
Freeze Panes .....	74

Using Formulae .....	75
Replication.....	75
Cell References.....	75
Sorting .....	76
Filtering .....	77
Functions .....	78
Analysis ToolPak .....	83
Spreadsheet Charts .....	83
PivotTable and PivotChart .....	85
Macros.....	85
What-If Analysis .....	86
Protecting Worksheets.....	90
<b>Presentation Graphics Software</b> .....	92
Output Options .....	92
Templates .....	92
View Options.....	92
Slide Options .....	92
Making Effective Presentations.....	93
<b>5. ENTERPRISE COLLABORATION SYSTEMS</b> .....	95
<b>Internet</b> .....	96
The World Wide Web .....	97
<b>Intranet</b> .....	98
Advantages of Intranet .....	99
Disadvantages of Intranet .....	99
<b>Extranet</b> .....	99
<b>Enterprise Collaboration Systems and Groupware</b> .....	101
Groupware.....	101
<b>Types of Groupware</b> .....	102
Enterprise Communication Tools .....	102
Enterprise Conferencing Tools .....	104
Collaborative Work Management Tools .....	107
<b>6. MANAGEMENT INFORMATION SYSTEMS</b> .....	111
<b>Information Systems for Business Operations</b> .....	113
<b>Transaction Processing Systems</b> .....	114
Data Entry.....	115
Transaction Processing .....	116
Database Updation.....	116
Report Generation .....	117
Inquiry Processing .....	117
<b>Functional Information Systems</b> .....	118
Marketing Information Systems .....	119
Manufacturing Information Systems .....	120
Human Resource Information Systems .....	121
Accounting Information Systems .....	122
Financial Information Systems .....	123

<b>Management Information Systems</b> .....	124
Evolution of MIS .....	125
Characteristics of MIS .....	125
Functions of MIS .....	126
Importance of MIS .....	127
Management Reporting Systems .....	127
<b>Decision Support Systems</b> .....	128
Characteristics of a DSS .....	128
Types of DSS .....	129
Applications of DSS .....	129
Geographic Information Systems (GIS) .....	130
<b>Executive Information Systems</b> .....	131
Pre-requisites of a Successful EIS Implementation .....	132
Guidelines for Preparing an Effective EIS .....	132
Artificial Intelligence .....	133
<b>Online Analytical Processing</b> .....	134
Characteristics of OLAP .....	136
Benefits of OLAP .....	136
<b>Information Systems for Strategic Advantage</b> .....	137
Improvements in Business Processes .....	137
Re-engineering Business Processes .....	137
Transforming into an Agile Competitor .....	140
Toward Creation of a Virtual Company .....	140
Knowledge Management Systems .....	141

### **Part Three: Software and Database Concepts**

---

<b>7. PROGRAM DESIGN AND PROGRAMMING LANGUAGES</b> .....	145
<b>Program Development Lifecycle</b> .....	146
Defining the Problem .....	146
Designing the Program .....	147
Coding the Program .....	147
Testing and Debugging the Program .....	148
Formalizing the Solution .....	148
Maintaining the Program .....	148
<b>Program Design Tools</b> .....	148
Flow Charts .....	149
Decision Tables .....	154
Control Structures .....	156
Pseudocode .....	157
<b>Generations of Programming Languages</b> .....	160
First Generation Languages .....	160
Second Generation Languages .....	161
Third Generation Languages .....	161
Fourth Generation Languages .....	162
Fifth Generation Languages .....	162
<b>Language Translators and Programming Languages</b> .....	163
Language Translators .....	163
Programming Languages .....	164

<b>Object-Oriented Programming – An Overview</b> .....	166
Basic Concepts in Object-Oriented Programming.....	166
<b>8. DATABASE MANAGEMENT</b> .....	169
<b>Database System</b> .....	170
Data Hierarchy .....	170
Components of a Database System .....	171
File Organization.....	172
<b>Data Models</b> .....	175
Record-Based Logical Models (RBLMs).....	175
Object-Based Logical Models (OBLMs).....	176
Physical Data Models .....	177
<b>Database Management Approach</b> .....	177
Characteristics of a Well-designed Database System.....	178
Types of Databases.....	179
Database Development .....	181
Managing Data .....	182
Benefits and Limitations of DBMS .....	183
Data Views .....	183
<b>The Entity-Relationship Model</b> .....	185
Basic Elements in the E-R Model.....	185
Converting an E-R Model to a Relational Model .....	187
E-R Structures .....	188
Importance of the E-R Model.....	190
<b>The Relational Database Model</b> .....	190
Structured Query Language.....	191
Designing a Relational Database.....	192
<b>Data Dictionary</b> .....	195
<b>Data Warehousing</b> .....	196
<b>Data Mining</b> .....	196
<b>Distributed Databases</b> .....	197
<b>Object-Oriented Databases</b> .....	198
<b>Object Relational Database System</b> .....	199

**Part Four: Networks**

---

<b>9. COMPUTER NETWORKS</b> .....	203
<b>Basics of Computer Networks</b> .....	204
Components of a Network.....	204
How Does a Network Work?.....	204
Computer Network Applications.....	205
<b>Classification of Networks</b> .....	206
Local Area Network (LAN) .....	207
Metropolitan Area Network (MAN).....	208
Wide Area Network (WAN).....	208
Virtual Private Networks (VPNs).....	209
Wireless Networks.....	209

<b>Peer-to-Peer and Client/Server Networks</b> .....	210
Peer-to-Peer Network.....	210
Client/Server Network.....	210
<b>Network Topologies</b> .....	210
Mesh Topology.....	210
Star Topology.....	211
Bus Topology.....	212
Ring Topology.....	212
Tree Topology.....	212
Hybrid Topologies.....	212
<b>Network Infrastructure</b> .....	213
Network Interface Cards.....	213
Repeater.....	214
Bridge.....	214
Routers.....	214
Hubs.....	214
Switch.....	214
<b>Network Architectures and Protocols</b> .....	215
The OSI Reference Model.....	215
The TCP/IP Reference Model.....	218
Switching Techniques.....	219
<b>10. TELECOMMUNICATION NETWORKS</b> .....	221
<b>The Telecommunication System</b> .....	222
Service Providers.....	222
Transmission Media.....	223
Standards and Regulations/Regulatory Authorities.....	223
<b>TELECOMMUNICATIONS IN BUSINESS</b> .....	224
Internal Business Systems.....	225
Enterprise Collaboration Systems.....	225
Electronic Commerce.....	225
Mobile Commerce Systems.....	225
<b>Scope of Telecommunication Networks</b> .....	225
Applications Scope.....	225
Technology Scope.....	226
Industry Scope.....	226
<b>Telecommunication Network Components</b> .....	226
Telecommunication Media.....	226
Terminals.....	228
Computers.....	229
Communication Channels.....	229
Telecommunication Processors.....	230
Telecommunication Software.....	231
<b>Telecommunications Equipment for WAN</b> .....	232
Uses of WAN.....	232
<b>Network Convergence</b> .....	233
<b>Part Five: Management of MIS</b>	
<b>11. MIS – PLANNING AND DESIGN</b> .....	237

<b>MIS Planning</b> .....	238
Strategic Planning for MIS .....	238
Planning Process for MIS Implementation .....	241
<b>MIS Design</b> .....	242
Approaches to Design of MIS .....	243
Design Process .....	245
<b>Systems Approach to Problem Solving</b> .....	247
Systems Development Life Cycle .....	249
<b>Make or Buy Decisions</b> .....	250
Building an MIS in-house .....	250
IS Procurement .....	251
IS Outsourcing.....	254
<b>12. MIS – IMPLEMENTATION, EVALUATION, AND MAINTENANCE</b> .....	257
<b>Organizational Change and MIS Implementation</b> .....	258
Change Approach to MIS Implementation .....	259
<b>Planning the MIS Implementation</b> .....	261
Identify and Establish Relationships among Tasks .....	262
Establish a Schedule .....	262
Prepare a Cost Estimate for the Tasks .....	262
Establish a Reporting and Controlling System .....	262
<b>The MIS Implementation Process</b> .....	263
Organizing for Implementation .....	263
Developing Procedures for Implementation .....	263
Train the Users .....	264
Hardware and Software Acquisition.....	264
Develop Forms for Data Collection.....	264
Developing Files for Storage of Data .....	265
Test the System .....	265
Cutover .....	266
Documenting the System.....	266
<b>Evaluation of the MIS Implementation</b> .....	267
Problems in MIS Evaluation .....	269
<b>Challenges in MIS Implementation</b> .....	270
<b>MIS Control and Maintenance</b> .....	272
Changes in Governmental Policies and Regulations .....	272
Changes in Economic Conditions.....	272
Changes in Industry and Competitive Conditions .....	272
Use of Latest Technologies .....	273
Problems Involved in MIS Maintenance .....	273
<b>13. INFORMATION RESOURCES MANAGEMENT AND IT GOVERNANCE</b> .....	275
<b>Managing Information Resources and Technology</b> .....	276
Definition of Information Resource Management.....	277
Objectives of IRM .....	278
Elements of IRM .....	278
IRM and Knowledge Management.....	279

<b>Information Technology and Organizational Needs</b> .....	279
People .....	280
Tasks .....	280
Technology .....	280
Culture .....	280
Structure .....	280
<b>Information Security and Controls</b> .....	280
ISO 17799 Standards .....	281
Cryptography .....	282
<b>Ethical and Social Dimensions of Information Technology</b> .....	284
Privacy .....	285
Accuracy .....	286
Property .....	286
Accessibility .....	286
<b>Disaster Recovery and Business Continuity Planning</b> .....	286
Disaster Recovery Planning .....	287
Business Continuity Planning .....	291
<b>IT Governance</b> .....	292
Overview of IT Governance .....	292
IT Governance and Sarbanes-Oxley Act .....	292
IT Governance Frameworks .....	293
<b>14. GLOBAL IT MANAGEMENT</b> .....	297
<b>Information Technology in Global Business</b> .....	298
Global Strategies .....	301
IT-enabled Services .....	301
<b>Global Management Information Systems</b> .....	304
<b>Challenges in Global Information Technology Management</b> .....	305
Cultural Differences .....	305
Geopolitical Challenges .....	305
Problem of Control .....	305
Information Requirements .....	306
Trans-border Flow of Data .....	306
Coordination .....	306
Varied Set of Skills .....	306
Standardized System .....	306
Telecommunication Networks .....	306
Computing Standards .....	307
Alignment of Strategies .....	307
Hardware Problems .....	307
Developing IT Solutions .....	307
Operational Problems .....	308
Vendor Problems .....	308
<b>Managing Information Technology in the Global Business Environment</b> .....	308
Strategies for Managing IT Globally .....	308
Approaches to Global IT Management .....	310
Numerous Problems, but Few Solutions .....	311

<b>15. MIS IN SPECIALIZED AREAS</b> .....	315
<b>MIS in Government Organizations</b> .....	316
<b>MIS in Non-Profit Organizations</b> .....	317
Information System Applications in NPOs .....	317
Challenges Faced by NPOs .....	318
Information Systems at CRY .....	319
<b>MIS in Managing Corporate Performance</b> .....	321
<b>MIS in Managing Projects</b> .....	322
Project Management Information Systems (PMIS) .....	322
Project Management at XIMB .....	324
<b>MIS in Online Marketplaces</b> .....	325
One-to-Many Marketplaces .....	325
Aggregator Hubs .....	325
Broker Hubs .....	326
Collaboration Hubs .....	326
Translator Hubs .....	326
True Many-to-Many Marketplaces .....	326

**Part Six: Enterprise Functions and E-Business**

---

<b>16. BASICS OF E-BUSINESS AND ENTERPRISE APPLICATION INTEGRATION</b> .....	331
<b>Evolution of E-Business</b> .....	332
Stages of E-Business .....	332
The Rise of E-Business .....	333
Traditional Business vs. E-Business .....	334
The Emergence of Infomediaries .....	335
<b>Organizational Culture for E-Business</b> .....	335
Ensure Commitment of Top Management .....	335
Create Incentives that Support E-Business Goals .....	335
Develop and Maintain a Bias for Action .....	335
<b>E-Business Models</b> .....	336
Business-to-Business Model .....	336
Business-to-Consumer Model .....	337
Consumer-to-Consumer Model .....	337
Business-to-Employee Model .....	338
Government-to-Citizen Model .....	338
Citizen-to-Government Model .....	338
Government-to-Government Model .....	339
Government-to-Business Model .....	339
<b>Enterprise Application Integration</b> .....	339
Principles of EAI .....	339
Need for EAI .....	340
What Does EAI Do? .....	341
EAI Standards .....	342
Impact of EAI Standards .....	342
<b>17. SUPPLY CHAIN MANAGEMENT AND E-BUSINESS</b> .....	345
<b>Supply Chain Management: An Overview</b> .....	346

<b>E-Supply Chain</b> .....	347
Components of the E-Supply Chain .....	349
Inter-Enterprise Integration .....	352
Supply Chain Planning .....	353
Supply Chain Execution .....	354
<b>Managing Relationships in the E-Supply Chain</b> .....	356
Commodity-Based Supplier Relationships .....	357
Strategic Supplier Relationships .....	358
<b>Issues in E-Supply Chain Management</b> .....	359
Appropriate Supply Chain Structure .....	359
Differentiation .....	361
Order Fulfillment Capabilities .....	361
Adequate Infrastructure .....	361
<b>Future of the E-Supply Chain</b> .....	362
Integrated Make-to-Stock .....	363
Continuous Replenishment .....	364
Build-to-Order .....	365
Outsourcing Supply Chain Management .....	366
<b>18. ENTERPRISE RESOURCE PLANNING</b> .....	369
<b>ERP: An Overview</b> .....	370
<b>Rationale for ERP</b> .....	370
<b>Enterprise Architecture Planning</b> .....	372
<b>Implementing ERP</b> .....	374
Understanding Corporate Needs and Culture .....	374
Complete Business Process Changes .....	374
Communicate Across the Organization .....	374
Strong Project Leadership .....	375
Efficient and Capable Project Leader .....	375
Balanced Teams .....	375
Approaches to ERP Implementation .....	375
<b>Effect of ERP on the Company</b> .....	377
Lead Time Reduction .....	377
Punctuality in Shipment .....	378
Reduction in Cycle Time .....	379
Enhanced Customer Satisfaction .....	380
Improved Supplier Performance .....	380
Flexibility and Reduction in Quality Cost .....	381
Improved Resource Utility .....	382
Improved Information Accuracy .....	383
<b>Overview of ERP Modules</b> .....	383
Finance and Accounting Module .....	384
Manufacturing Module .....	384
Sales and Distribution Module .....	385
Human Resource Management Module .....	385
Plant Maintenance Module .....	385
<b>ERP Investments in the US</b> .....	386
Industry-specific Extensions .....	386
Business Intelligence .....	387
General ERP Upgradations .....	387

<b>ERP Market – The Indian Scenario</b> .....	387
<b>ERP Implementation Problems</b> .....	388
<b>Emerging Trends in the ERP Industry</b> .....	389
Service-Oriented Architecture .....	389
XERP Products .....	390
Problems of XERP Vendors .....	390
Future of XERP .....	390
<b>Future of ERP Applications</b> .....	391
ERP – Evolving to Link with Supply Chain Planning.....	391
<b>19. CRM AND E-BUSINESS</b> .....	395
<b>Defining CRM</b> .....	396
Strengthening Relationships with Existing Customers.....	397
Using Customer Information to Provide Better Service .....	397
Creating Customer Value and Loyalty .....	397
Implementing Integrated CRM Solution Strategy .....	397
<b>Functions of CRM</b> .....	397
Attracting New Customers .....	397
Generating More Business from Existing Customers.....	397
Retaining Profitable Customers.....	398
<b>The E-CRM Architecture</b> .....	399
E-CRM Components .....	399
<b>E-CRM Infrastructure Requirements</b> .....	400
Integration of Customer Content .....	401
Integration of Customer Contact Information .....	401
Integration of the Extended Enterprise .....	401
Integration of Systems .....	401
<b>CRM for E-Customers</b> .....	402
Targeting E-Customers.....	402
Acquiring E-Customers .....	403
Retaining E-Customers.....	403
<b>Challenges in Implementing E-CRM Projects</b> .....	404
